

Oil Free / Silent Compressors

The Sale Engineering oil free / silent compressor is designed for pre-action and detector pipe work systems, where quiet operation is required. For example, computer rooms, office suites and residential applications. The unit is suitable for 100% continuous operation.

- Complies with LPC guidelines
- All materials supplied comply with the (PED) 97/23/EC regulations
- Pressure tested prior to despatch

Key Benefits:

- Continually Rated
- Oil Free
- Silent Operation
- (64 DbA at 1 metre)

Standard Unit Includes:

- Electric motor driven single stage air compressor
- Outlet flexible hose connection: ½ " BSPT
- Full electrical wiring and pressure testing
- Integrated wall brackets with anti vibration mounts
- Factory set pressure switch and restrictor
- Pressure safety relief valve (set at 5.5 Bar)
- Starter, thermal overload and 'on' delay timer

On delay timer set at ten minutes to reduce the time required for water to reach an open head / test valve. The time delay also protects motor and pressure switch against hunting and overheating.

Dimensions: Width 600mm x Depth 310mm x Height 370mm (+ clearance for cooling / access)

Options:

Floor Mounting Kit
Riser Mounting Kit
Pressure Gauge

Model	FAD (CFM)	Volts	Phase	Motor		Load Amps	Pressure	
				HP	KW		Bar	PSI
SEP400S.OF/LPC	3.8	240V	1	0.60	0.44	3.4	8	115
SEP400T.OF/LPC	3.8	415V	3	0.60	0.44	3.4	8	115

Please note three phase compressors require a phase / neutral electrical supply. Please clearly state the application of the compressor at quotation stage or when ordering.
